

Maintenance Procurement Policy

Controlled document APS-PROC-007 | Revision 2

1. Scope

This policy governs comparison and recommendation of replacement parts used in maintenance work at Aegis Process Systems Pvt. Ltd.

2. Commercial controls

Maximum budget: INR 50,000. Required currency: INR. Values from the original quotation must be preserved in the evaluation record.

3. Delivery control

Maximum lead time: 14 days. Quotations with a longer delivery commitment require review and are not eligible for automatic recommendation.

Maintenance Procurement Policy

Controlled document APS-PROC-007 | Revision 2

4. Warranty control

Minimum warranty: 18 months. A shorter warranty requires review and is not eligible for automatic recommendation.

5. Recommendation rule

Recommend the lowest evaluated total only among vendors that pass every stated budget, currency, delivery, and warranty control. A cheaper non-compliant offer must remain under review and must not be selected automatically.

6. Approval boundary

The procurement manager must verify taxes, supplier eligibility, technical equivalence, signatures, and original quotations before issuing a purchase order. Decision-support output is not purchase authorization.
